WUXUS

System update 4 June 2018

The following major changes have been implemented:

Theme	Description
New colours	We have added new pleasant colours to the platform and certain Order statuses.
New Order statuses	We have renamed certain Order statuses (see table below).
New Welcome screen	From now on you will be welcomed by a Dashboard including an overview of your Live orders, Failed orders, and the total count of orders which have passed through the system for your business. You can change, delete and create new dials at any time.
Improved Order overview and Order cards	The information in the Order overview and in the individual Order cards have been rearranged. The more important information is now more apparent and enhanced.
Planning	In the Order cards in the Planning overview, the more important information is now also appearing clearer. You can retrieve further information from the individual Order card by clicking the 'Expand' arrow.

New Status codes and colour coding:

NOW	Before
Todo	Awaiting assignment
Planned	Awaiting pickup
In Transit	Picked up
Missed (pickup)	on hold
Missed (delivery)	Returning
Unknown	Unknown
Done	Done
Canceled	
Archived	Archived

There are no updates this time around to our Driver App. We expect a major new release for the App during late summer or fall 2018.
